

Co-funded by the
Tempus Programme
of the European Union

February 28, 2017

Dear Consortium Members

Today marks the end of our Tempus funded project, which began officially on December 1st 2013. We went a long way together from the Porto kick-off meeting to the summary meeting in Barcelona.

I want to commend the collaborative effort, dialog and enthusiasm which led us to meet our project goals successfully, exceeding the requirements on all parameters and increasing the scope of our achievements.

The program focused on implementing lifelong learning methodologies in Israeli HEI's. I feel however, that each of us has not only contributed, but also gained from LLAF and was enriched by the work and exposure to other methods and ideas.

For some, this was a first experience in a multi-national collaborative funded project and I'm pleased to see how many have leveraged their experience and are already in new frameworks facing new challenges.

I want to thank all the administrative staff in EU and Israeli institutes that followed this program, supporting their teams and the consortium as a whole.

Lastly, warm thanks to the Tempus program, our regional officer Róisín and the Israeli representatives Marissa, Dina and Katherine for the funding, guidance and support.

I take this opportunity to remind everyone that our financial and reporting commitments have to be met. We require all financial reports to be submitted as soon as possible and preferably by March 13th, as we are launching the internal audit.

I thank you all for your endeavors and hope that our paths may meet again.

Best,
Michael.
